Enseñanzas de Grado, Postgrado y
Formación Permanente

Doctoral studies in Law

Basic competencies

CB11 - Systematic understanding of a field of study and command of research skills and methods related to this field.

CB12 - Ability to conceive, design, or create, put into practice, and adopt a substantial research or creative process.

CB13 - Ability to contribute to broadening the frontiers of knowledge through original research.

CB14 - Ability to make a critical and evaluative analysis and synthesis of new and complex ideas.

CB15 - Ability to communicate with the academic and scientific community and with society in general about their corresponding areas of knowledge through the usual means and languages used in the international scientific community.

CB16 - Ability to promote scientific, technological, social, artistic, or cultural advances in academic and professional contexts within a knowledge-based society.

Personal abilities and skills

CA01 - Operate effectively within contexts where there is little specific information.

CA02 - Find the key questions that need to be answered in order to solve a complex problem.

CA03 - Design, create, develop, and undertake novel and innovating projects in the field of knowledge.

CA04 - Work in an international and multi-disciplinary context on a team as well as independently.

CA05 - Integrate different areas of knowledge, cope with complexity, and formulate opinions with limited information.

CA06 - Intellectual criticism and defense of solutions.

Other competencies

CE01 - Capacity to carry out research work in the fields covered by this doctoral programme.

CE02 - Having acquired advanced knowledge in the field of Law and having demonstrated a qualified and deep comprehension of theoretical and practical aspects related to economic and law institutions from a scientific research point of view.

CE03 - Having produced a relevant original contribution to scientific research in the field of law and law institutions, that merits recognition from both the national and the international scientific community.

CE04 - Having demonstrated the capacity to design a research project enabling critical analysis of current public institutions and comparative law.

CE05 - Being able to organize, manage and lead innovative research teams and research projects in an autonomous way.

CE06 - Being able to carry out research work with social responsibility, scientific integrity and respect for essential rights.

CE07 - Being able to participate in the scientific debate both at national and international

levels and to disseminate research results.
